

**CROWN**

# **MPC 3000** SERIES

# Unmatched Versatility

The Crown MPC Series defines versatility. With its counterbalance engineering, ergonomic design and mast options, it gives operators the opportunity to do more with one truck.

Adaptable enough to do the work of stackers, counterbalance, pallet trucks and more, it can reach high and handle loads while being small and nimble enough to maneuver tight spaces with ease. It's a new breed of truck that's up to the task.

**The Crown MPC 3000 Series.**  
Versatile by Design.

The truck's counterbalance design provides full clearance of the forks from the load wheel, eliminating the need to provide extra clearance between pallets and under conveyors. Operators can save space by packing pallets closer, and save effort by fitting under conveyors easier.

# Ergonomic Order Picking

The MPC Series allows operators to raise and lower the forks so they can build pallets at a comfortable height.

The truck helps minimize the strain of lifting heavy material from the height of the shelf or ground to the height of the truck, which improves operator comfort, reduces back strain and saves time.

## Versatility

The MPC Series harnesses the strength of multiple trucks in one and performs across a variety of applications from the dock to transport and put-away, which saves time and increases throughput.

## Operator Focused

Optimal convenience, visibility, maneuverability and control enable the operator to work more comfortably in various work environments.

## Durability

Because the MPC Series is designed to perform many operations, it's built to last with an I-beam mast construction, steel skirt and chassis, and large load wheels.

# Dock-to-Stock Versatility

The versatility of the MPC Series means it can do the job of multiple trucks without compromising productivity. For example, when low-level stock is depleted, many facilities halt work and use a reach truck or other high-lifter to drop down another pallet load. This takes time and reduces throughput. With the MPC Series, these tasks can be completed with a single truck—avoiding delays and reducing reliance on additional equipment.

## 1 TRUCK FOR EVERY TASK

### Dock

With excellent visibility and precise control, operators can position and move materials quickly and safely.

**Visibility** is achieved with a nested I-beam mast construction and a fork carriage that minimizes obstructions.

**Counterbalance Design** eliminates traditional outriggers that can interfere with stationary equipment or closely-placed loads.

### Transport

Smooth, strong acceleration and braking set the pace for cross-docking and long-distance transport.

**Speed Cornering Control** includes sensors that monitor steer wheel angle, fork height and load weight to adjust speed and acceleration.

**e-GEN® Braking System** uses the powerful torque of the AC motor to provide consistent and reliable long-term performance.

### Replenishment/Retrieval

Industry-leading visibility and unmatched truck versatility contribute to overall throughput.

**High-Visibility Overhead Guard** gives operators a clear view for positioning forks and loads at height.

**High-Lift Mast, Counterbalance Design and Adjustable Forks** allows the MPC to perform operations from block stacking to high-level access.

Functions on a dock like a pallet truck.

Moves loads like a pallet truck.

Handles replenishment/retrieval like a stacker/counterbalance truck.

# Operator-Focused Comfort & Control

The true measure of an exceptional multi-purpose truck is how it takes care of the operator. Crown engineers designed the MPC Series with best-in-class visibility, maneuverability and control so operators can do their very best work all day long.

**Excellent Visibility** through the mast is achieved with nested I-beam construction and fork carriage design. In addition, overhead visibility is optimized with an overhead guard design that provides a better view when positioning forks and loads at height.

**Spacious Operator Compartment**, combined with a low step height, accommodates operators of various sizes while providing ample room for task movements and comfortable entry and exit of the truck.

**Optional Crown Work Assist® Accessories** can be combined and tailored to enhance comfort and productivity. Shown above: clipboard, trash bag holder, storage pocket and beverage holder on front mounting tube.

# Serious Durability

Contributing to operator safety and confidence is Crown's commitment to truck strength. The MPC Series is built to last and is equipped with durability features that operators can count on to help them complete a number of demanding tasks throughout their facility.

**Sturdy I-beam mast design** enables the truck and operator to confidently handle full capacity loads at height.

**Heavy-gauge Steel Skirt and Covers** reduce truck damage in demanding and congested applications by protecting valuable truck components.

**Large Load Wheels** extend load wheel life and are designed for easy access and quick replacement.

## More Uptime for Your Investment

Crown's integrated approach combines truck feedback and diagnostics, Crown-made parts and dedicated service teams to give you more uptime and the lowest total cost of ownership.

**Access123®**

**Access 1 2 3® technology** enables advanced diagnostics through an intuitive display. This diagnostics system, used across all Crown trucks, increases technician proficiency, resulting in significant savings in service time and costs.

**InfoLink®**

**InfoLink®** is a wireless operator and fleet management solution that puts the power of accurate, up-to-date, business metrics right at your fingertips.

**MPC infopoint®**

**Crown's InfoPoint® Quick Reference Guide** and on-truck component maps provide technicians with vital information to quickly, accurately and easily resolve issues without wiring diagrams or schematics.

**INTEGRITY Service SYSTEM®**

**Crown's Integrity Parts and Service System™** solutions ensure long-term truck performance by matching trained technicians with Crown-made parts for long-lasting performance. That's a major difference with Crown.
