

## SP SERIES

# CLEARLY. ELEVATED. PERFORMANCE.

Every element of the Crown SP 3500/4000 Series is designed to work together with the operator to optimize the order picking process. With unmatched visibility, extraordinary stability, impressive performance and proven longevity, Crown's SP series trucks deliver what every operation needs: clearly elevated performance.

Discover how the SP 3500/4000 series elevates your results.

### Visibility

Clear vision is the foundation of operator confidence. With the largest window on any order picker, the Crown SP series makes operators clearly more productive.

### Room to Move

The Crown SP series delivers the most usable floor space of any truck. Additional space can be achieved through optional extensions.

### Stability

Ample use of steel—from the mast to the side gates, and everything in between—means less sway, and more operator certainty, for greater productivity all around.

### Performance

Based on operational needs, the SP series can provide more capacity at height, regenerative lower and the fastest lift and travel speeds of any stockpicker.

### Longevity

Crown's integrated approach combines truck feedback with diagnostics, Crown-made parts, and trained service teams mean more uptime and the lowest total cost of ownership.
